## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The IDS paper filed September 25, 2000 has been received and placed in the record of file.

### ***Specification***

2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b).

An abstract on a separate sheet is required.

### ***Claim Objections***

3. Claims 5-47 and 59-70 are objected to under 37 CFR 1.75© as being in improper form because a multiple dependent claim can not depend on another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-47 and 59-70 have not been further treated on the merits.

### ***Claim Rejections - 35 USC § 112***

4. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per independent claim 1 (line 6), the term "a penalty" is considered to be vague and indefinite.

Art Unit: 2671

As per claim 2 (line 2), the term "said penalty function" lacks antecedent basis.

Claims 3-4 depend on claim 1, they are rejected with the same reason as set forth in claim 1.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-4, 48-58 are rejected under 35 U.S.C. 102(b) as being anticipated by Lorensen et al (U.S. Patent No. 5,611,025).

As per independent claim 1, Lorensen et al disclose a virtual internal cavity inspection system comprising a step of providing a medical imaging data set representing a cavity and a boundary (col.3, lines 5-22), a step of providing a plurality of points in the data set including at least a starting point and an ending point (col.3, lines 25-45), and a step of automatically determining a path between the starting point and the ending point responsive to a penalty associated with passing through various points in the cavity (col.4, line 39 through col.5, line 15).

As per dependent claims 2-3, Lorensen et al further teach wherein the penalty function is responsive to a morphology, which comprises a width, of the cavity (col.4, line 39 through col.5, line 15).

Art Unit: 2671

As per claim 4, Lorensen et al further teach wherein the morphology is a local morphology (col.6, lines 22-34).

Due to the similarity of claims 48-58 to claims 1-4, they are rejected under a similar rationale.
